DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Rossmann (6,625,447).

Regarding claims 1, 12-13, Rossmann discloses a method and architecture for an interactive two-way data communication network comprising the steps of: transferring first unit transfer data containing at least a plurality of unit display data from a first transmission source to a transmission destination (see fig.1, elements 100, 110, 120, 121, col.12, lines 16-23 and its description); and when display of unit display data of the first unit transfer data is designated at the transmission, displaying the unit display data of the first unit transfer data and another display data (see fig.2, col.12, lines 16-33 and its description).

Regarding claims 2-3, 5-7, 9, 11, Rossmann further discloses the first unit transfer data contains special unit display data and a plurality of unit display data, and the step of displaying comprises the step of displaying the unit display data of the first

unit transfer data and the special unit display data as another display data in a predetermined order (see fig.2-4, col.12, lines 24-col.19, line13).

Regarding claims 4, 8, Rossmann further discloses the step of automatically switching to display unit display data of the first unit transfer data after the special unit display data is displayed for a predetermined period of time (see col.48, line 31-col.49, line 36)

Regarding claim 10, Rossmann further discloses the transmission source is a control station, and the transmission destination is a portable terminal for performing information communication with the control station through a radio base station (see fig.1, elements 100, 110, 121 and its description).
